

# TLTR(Ka) series

### Ka-Band, Remote Mounted, Test Loop Translators

TLTR2750	Ka-Band TX (27.5-28.5GHz) to L-Band
TLTR2800	Ka-Band TX (28.0-29.5GHz) to L-Band
TLTR2900	Ka-Band TX (29. 0-30.0GHz) to L-Band
TLTR2960	Ka-Band TX (29.6-30.2GHz) to L-Band
TLTR3000	Ka-Band TX (30.0-31.0GHz) to L-Band
TLTR3100	Full Ka-Band TX (27.5-31.0GHz) to Ka-Band RX (17.7-21.2GHz)

For other non-standard frequency requirements, please contact the factory. For equivalent rack mount units, please see TLT(Ka) & TLTH(Ka) series datasheets.

The **TLTR(Ka)** series of test loop translators are designed to take a sample of the transmit signal and convert it to a frequency at which it can be monitored or analysed. Often monitoring of the transmit signal is required at L-Band, or alternatively a translation of the transmit signal to the receive band which is then applied to the receive equipment in a test mode.

TLT units are supplied without filtering and the output of the unit therefore contains all mixing products. Units with filtering are also available, please consult the factory.

These units are offered with optional electronically variable attenuation and Ethernet for remote control (with embedded web-server and supporting SNMP network management control).

The unit is housed in a rugged weatherproof chassis, suitable for either internal or external/remote locations. For supply, the unit accepts a wide range of DC voltages, or can be offered with the OPS18b/ OPS27c outdoor AC/DC PSU's.

### **Peak Features**

- High stability and excellent phase noise
- Full alarm monitoring
- Rugged weatherproof housing
- Optional electronically variable 0 to 30dB attenuator
- Outdoor weatherproof OPS series AC/DC PSU's available
- Optional Ethernet based remote control

### TLTR(Ka) series – Typical Specification

28.0-29.5GHz

950-2450MHz

#### **TLTR2750**

Input frequency	27.5-28.5GHz
Output frequency	950-1950MHz

#### **TLTR2800**

Input frequency Output frequency

**TLTR2900** 

Input frequency 29.0-30.0GHz 950-1950MHz Output frequency

#### **TLTR2960**

Input frequency 29.6-30.2GHz **Output frequency** 950-1550MHz

#### **TLTR3000**

30.0-31.0GHz Input frequency **Output frequency** 950-1950MHz

#### **TLTR3100**

Input frequency Output frequency 27.5-31.0GHz 17.7-21.2GHz

Notes; LO related spurious performance limited to -25dBm typ., for 20dB insertion loss. Lower LO related spurious levels can be achieved with higher insertion loss (please contact the factory). Signal related spurious -16dBc typ.

#### Variable Attenuation (Option 3) 30dB nominal

Attenuation range Step size Control

Connector

Return loss

Max input power

1dB GCP

Input

0.1dB, 0.125dB or 0.5dB (see options list) Remote via Ethernet (requires option 9) K-type (f) or 2.92mm (f), 50Ω 18dB

+10dBm +15dBm

#### Output Connector

Return loss

N-type (f), 50Ω Note; K-Type(f) or 2.92mm(f), 50Ω as standard for TLTR3100. K-type (f) or 2.92mm (f), 50Ω Option 2c: 18dB

#### **Transfer Characteristics**

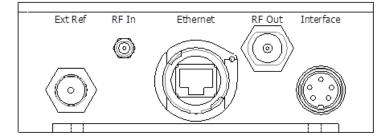

Conversion loss 20dB ±2dB at 0dB attenuation Gain stability ±0.25dB from 0 to 40°C

#### **RF Performance**

LO phase noise

-65dBc/Hz @ 100Hz -90dBc/Hz @ 1kHz -95dBc/Hz @ 10kHz -100dBc/Hz @ 100kHz -120dBc/Hz @ 1MHz

## **Connector panel view** (sample)

#### **Internal Back-up Reference** 1 x 10<sup>-11</sup> over 1s

Allan deviation Ageing Temp stability

**External Reference Input (Option 4)** 

```
Frequency
Level
Connector
Locking delay
```

10MHz (5MHz factory settable) 0dBm ±5dB Separate TNC (f), 50Ω Required phase noise to be better than 50dBc/Hz of output phase noise <2 minutes to stabilise from cold

<5 x 10<sup>-9</sup> per day, <5 x 10<sup>-7</sup> per year <5 x 10<sup>-8</sup> over 0 to 60<sup>o</sup>C

#### **Mechanical** Width

Height Depth Construction Weight

147mm (5.79") 223mm (8.78"), plus connections & mounting flanges 56mm (2.2") Die-cast Aluminium, IP66 rated 1.4kgs (3lbs)

and

#### **Control System Interface**

Alarms	Summary alarm contacts
Connection	Multi-pin circular, weatherproof (mating part supplied)
Remote control	Ethernet; embedded web server &
(Option 9)	SNMP network management support
Note; option 9 incl	reases size of the unit to H290x W230x D95mm
voltage range to +	-27 to +36VDC.

### Env

Environmental	
Operating temp	-25°C to +55°C (less solar gain)
Option 12b;	-40°C to +55°C (less solar gain), with extended
	warm-up time for cold start & higher current
Humidity	0-100% condensing
EMC	EN 55022 part B & EN 50082-1
Safety	EN 60950

### **Power Supply**

Voltage Current

+16.5 to +35VDC 1.5A max (option dependent) Fed via control system interface connection Connection Option 14a; Fed in on L-band cable (L-Band output versions only) Option 14b; Fed in on the L-Band cable as well as the multi-pin circular control interface connection (L-Band output versions only)

### **Options**

- 2c) K-type (f) or 2.92mm (f) output connection
- 3a) 30dB L-Band electronic variable attenuator, 0.5dB step
- 3b) 30dB L-Band electronic variable attenuator, 0.1dB step
- 3f) 30dB Ka-Band electronic variable attenuator, 0.125dB step
- 4) External 10MHz reference input.
- Ethernet interface with embedded web server & SNMP 9)
- Low temperature operation to -40°C 12b)
- 14a) DC input via L-Band interface, replacing the control interface feed system
- 14b) DC input via the L-Band interface, as well as the standard DC feed system via the control interface

Note; some of the above options have an impact on the performance specification, for details please contact the factory if this is thought to be critical
