## RCU1001 Series

## 1+1 to 8+1 Redundancy Switching Units for the IBU/ IBD series of Block Converters \& ILA series of Line Amplifiers

RCU1001 for use with;
IBU/ IBD series Block Converters
ILA series Line Amplifiers
RCU1001(Ka) for use with;
IBU(Ka)/ IBD(Ka) series Block Converters
The redundancy switch unit can monitor and control up to 8 IBU/ IBD/ ILA series converters/ amplifiers plus 1 standby unit, to provide full system redundancy. Channel priority can be preset to ensure that high priority traffic is maintained. The RCU1001 series also incorporate input and output switching to fully isolate individual channels to ensure that any defective converter can be replaced without any disruption to signal transmission.

The RCU1001 series are 4 U high 19" rack mount units with a full front panel system mimic, graphics display module and membrane keyboard which provide clear, intuitive controls and monitoring. The RCU unit can be controlled from the front panel or by the RS232/ 485 link to a host computer (Ethernet interface option available).

## Peak Features

$\triangle$ L-Band and RF switching for isolation of individual channelsFull remote controlExpandable up to 8+1 configurationFull mimic monitoring of system statusDual redundant power supplies

## Ordering information

RCU units can be configured for switching of up to 8 channels.
The RCU can be populated with any number of switches and can be expanded at a later date.
To order a fully populated 1 for 8 RCU unit use type number RCU1801, for a 1 for 4 use RCU1401 etc.

## RCU1001 Series - Typical Specification

IF Interface (for ILA series IF amplifiers)
Frequency range $\quad 50$ to 180 MHz
Connectors
Option 1
BNC (f), $50 \Omega$
BNC (f), $75 \Omega$
15 dB min
Return loss
70 dB min
Isolation
IF insertion loss $\quad 0.3 \mathrm{~dB}$ nominal
Standby in to stby out; $0.3 \mathrm{~dB}+0.3 \mathrm{~dB}$ per channel
L-Band Interface
Frequency range
Connectors
Return loss
Isolation
$950-2150 \mathrm{MHz}$
SMA (f), $50 \Omega$
16 dB min
100 dB min
L-Band insertion loss $\quad 0.6 \mathrm{~dB}$ nominal
Standby in to stby out; $0.6 \mathrm{~dB}+0.3 \mathrm{~dB}$ per channel
RF Interface
Frequency range to 18 GHz (to 31 GHz for Ka-Band)
Connectors
Ka-Band;
Return loss SMA (f), $50 \Omega$
$50 \Omega$, K-Type (f) or 2.92 mm (f)
$>13 \mathrm{~dB}$, band specific
70 dB min (Ka-Band 50dB)
$<3 \mathrm{~dB}$, band specific $3 \mathrm{~dB}+1 \mathrm{~dB}$ per channel, band specific
Standby in to stby out;
Performance
Switchover time
<500ms
Mechanical
Width
19", standard rack mount
4U (7")
Depth
Construction
Weight
Environmental
Operating temp
EMC
Safety

420 mm (16.5"), plus connectors
Aluminium chassis
8kgs (17.6lbs) max.

0 to $+50^{\circ} \mathrm{C}$
EN 55022 part B \& EN 50082-1 EN 60950

Power Supply (dual, redundant)

| Connection | IEC (dual feed cables provided) |
| :--- | :--- |
| Voltage | $90-264 \mathrm{VAC}$ |
| Frequency | $47-63 \mathrm{~Hz}$ |
| Power | 50 W max |

Control System Interfaces
Remote control RS232/485 serial interface, 15-Way, D-Type
Option 9; Ethernet; embedded web server \& SNMP network management support.
Converter alarms Summary alarm (form C)
Alarm outputs RCU1001 alarm (form C)
IBU/IBD/ILA summary alarm (form C)

## Options

1) $75 \Omega$ IF interfaces for ILA series (IF version)

2d) High quality, matched L-band, RF (C, X or KuBand) and control cable set (to interface to the Peak IBU/ IBD/ ILA series converter/ amplifier range, when mounted adjacent to the RCU (with typically on-line units above and standby unit below the RCU).
2e) See option 2d above but includes DBS-Band SHF cables.
2f) See option 2d above but includes Ka-Band SHF cables.
9) Ethernet interface with embedded web server \& SNMP.

Note; some of the above options have an impact on the general performance specification; factory guidance should be sought if this is thought to be critical.
