# T1000, R1000, TR1000, A1000L/H, B1000L and P1000L 

## 1+1 Redundancy Switch for the P7000 \& IBUH/ IBDH series frequency converters, ILAH series Line Amplifiers, PTR50 Beacon Receivers \& UPC series Uplink Power Controllers.

T1000L, R1000L, TR1000L for use with P7000 series IF/ L-Band synthesised converters<br>T1000LD, R1000LD, R1000LQ for use with P7001D/ 1Q/ 2D series IF/ L-Band synthesised multi-channel converters T1000H, R1000H, TR1000H for use with P7000 series IF/ SHF (S, C, X, Ku, DBS-Band) synthesised converters T1000HH, R1000HH for use with IBUH, IBDH series L/ SHF (S, C, X, Ku, DBS-Band) block converters T1000HH(Ka), R1000HH(Ka) for use with IBUH(Ka), IBDH(Ka) series L/ SHF (Ka-Band) block converters<br>A1000L for use with ILAH series L-Band line amplifiers<br>A1000H for use with ILAH series SHF line amplifiers<br>B1000L, B1000Ku for use with PTR series L-Band beacon receivers<br>P1000/L/Ku, P1001/L/Ku, P1002/L/Ku etc. for use with UPC series multi-channel up link power controllers

The T1000, R1000, TR1000, A1000L \& P1000series $1+1$ redundancy switch units are designed to take advantage of the redundancy control interface which is built in as a standard feature of the P7000 series of synthesised converters, the IBUH, IBDH series of block frequency converters, the ILAH series of line amplifiers, the PTR series of beacon receivers and the UPC7000 series of uplink power controllers.

The system is designed to provide redundancy for a single-feed system, maintaining maximum availability whilst allowing routine maintenance and repair work to be carried out on the standby unit, without the normally associated down-time.

The system maintains one 'host' unit on-line whilst the other is held in hot standby and allows the user to select the on-line unit. The redundancy unit is controlled from the front panel of the host units (local mode) or via the host units RS232/ 485 serial communications (or optional Ethernet) port (remote mode). In remote mode, the on-line unit can be selected and monitored whilst keeping switch-over automatic in case of failure.
In automatic mode, the system monitors the host unit alarm status and if a fault condition develops within the on-line unit, automatically switches traffic to the standby unit.

The unit is standard 19 -inch rack mountable, however having no front panel controls can be mounted in the rear of the rack and connected with the cable set provided. For P7000series L-Band converters and L-Band line amplifiers, also L-Band beacon receivers and L-Band AUPC (when fitted with DC \& 10MHz pass-through options) the units are designed to pass the DC and 10 MHz external reference frequency required to lock an LNB or BUC.

## Peak Features

High quality, matched IF, L-Band \& RF (as appropriate) cable set included as standard Does not require rack 'front panel' space
Fully compatible with Peak P7000, IBUH, IBDH, ILAH, PTR50 and UPC7000series units

# T1000, R1000, TR1000, A1000, B1000 \& P1000series - Typical Specification 

IF, L-band \& RF Interfaces
Frequency

| IF | 50 to 200 MHz |
| :--- | :--- |
| L-band/RF | DC to 18.4 GHz |
| RF (Ka) | to 31.0 GHz |

Connections for P7000 series Converters IF
$50 \Omega$, BNC (f).
Option 1; 75 , BNC (f)
L-band/ RF
50 , N-type (f)
Connections for IBUH, IBDH series Converters L-Band/ RF $50 \Omega$, SMA (f)
Connections for IBUH(Ka), IBDH(Ka) series Converters L-Band $50 \Omega$, SMA (f) RF (Ka) $\quad 50 \Omega$, K-Type (f) or 2.92 mm (f)
Connections for ILAH series Line Amplifiers L-Band/ RF $50 \Omega$, SMA (f)
Connections for PTR50 Beacon receivers L/Ku-Band input 50 , N-Type (f) DC output BNC (f)
Connections for UPC series AUPCs IF/L-Band uplink 50 , SMA (f) L/Ku-Band input $50 \Omega, \mathrm{~N}$-Type (f) (for internal beacon receiver) DC beacon input BNC (f)
DC aux. output BNC (f)
Switch Element Parameters
Type Co-axial, latching

## Typical System Performance

The following gives the typical performance that can be expected from a system comprising Peak converters/ line amplifiers/ beacon receivers/ AUPCs \& using the high quality matched IF, L-band and RF cable sets;

Gain flatness $\quad \pm 1 \mathrm{~dB}$ full band, band specific
Insertion loss (excludes unit gain/loss)
IF 3.5 dB
L-Band $\quad 0.5 \mathrm{~dB}$ *
S-Band $\quad 0.5 \mathrm{~dB}$
C-Band $\quad 1.5 \mathrm{~dB}$
X-Band $\quad 2.0 \mathrm{~dB}$
Ku-Band $\quad 2.5 \mathrm{~dB}$
DBS-Band 3.0 dB
Ka-Band $\quad 3.5 \mathrm{~dB}$
$10 \mathrm{MHz} \quad 0.5 \mathrm{~dB}$
Switching speed $<800 \mathrm{~ms}$ (from fault to switch completion) *

## General

Mechanical
Width
19", standard rack mount
Height
1RU (1.75")
Note: For P100x/ P100xL series (uplink power controllers), 2RU (3.5").
Depth $\quad 150 \mathrm{~mm}(6$ "), plus connectors
Weight (nom.) $\quad 1.5 \mathrm{kgs}$ (3.3lbs)
Construction Aluminium chassis
Environmental
Operating temp 0 to $+50^{\circ} \mathrm{C}$
EMC EN 55022-part B \& EN 50082-1
Safety EN 60950
Control System
Converter interface D-type, 9-way
Power Supply (P1003x /4x only)
Voltage 90-264VAC
Frequency $\quad 47-63 \mathrm{~Hz}$
Power 25 Watts max (configuration dependant)
Option 10; Redundant PSU; provides a 1+1 redundant power supply configuration with separate prime power inputs
Note; provides rear panel visual indication of individual PSU condition only

## Options

1) $75 \Omega$ IF connections.
2) DC \& 10MHz pass-through (B1000L \& P100xL series only).
3) Redundant power supplies (P1003x/4x only).

Notes: For B1000L (PTR series beacon receivers) and P100xL (UpLink power controllers fitted with integral beacon receiver options);
1/ 10dB nominal L-Band beacon input signal insertion loss.
2/ Expect 0.15 dB nominal variation for un-terminated input.
$3 / 10 \mathrm{~ms}$ nominal 'outage' on switch-over where DC output drops to minimum (AUPC unit automatically detects this and freezes the output compensation).
4/ Reference signal source facility for externally referenced LNB's is 'passed through' but will result in LNB frequency change and likely 'loss of lock' during switch-over, if required Peak can fit reference generation circuitry within the switch unit to overcome this.
